WHAT'S NEW?

SEPTEMBER 2026

Nutrien Fawcett - Mt Pleasant Update

Two markets, five stud sales, and the Royal Adelaide Show! It must be September! Spring is here and the great start to the season is really starting to show with some fantastic looking, fresh sucker lambs coming through. Hopefully we get some good follow up Spring rain to keep the dams full, the crops in top shape for harvest and the livestock in that top forward condition.

If there is something you would like to see in our newsletter, please contact Sam:

samantha.schultz2@nutrien.com.au or 0417 851 790.

Stud Sales

Stud sales continue this month and we saw great results from our first sale of the season at Hilton Heath.

Check the dates on the left for the next run of sales and lock in the ones you will be attending. Can't get there? No problem, give one of the agents or our office a call and we can help you out. You will find the stud sale posters in the pages of this newsletter.

Annual 1st X BlMo Ewe Sale & Merino Off Shears Sale & British Breeds Ram Sale

This year our Off Shears Sale will be held on Wednesday the 4th of November at 10:00am, with the ram sale to follow after the sheep sale. We will be sending booking forms out for this sale sometime this month. Save the date if you are looking to sell or re-stock some quality breeders!

Real Estate

We have had a number of enquiries regarding real estate - we work closely with Peter Marschall who is a real estate agent with Nutrien Harcourts at Gawler. Peter knows this area exceptionally well and comes highly recommended. Give him a call on 0428 196 935 if you are thinking about putting your market on the property or even just looking for an appraisal.

MARKET RESULTS - AUGUST 13TH 2026

144 Cattle, 769 Sheep & Lambs

CATTLE	Weight Range	Low c/kg	High c/kg	Low \$/Head	High \$/Head

Store Shedding Lambs	\$ 142.00	\$ 230.00			

MARKET TRENDS

August was kind with good rainfall across the state and some sunshine & warmth to finish the month.

As we lead into spring we continue to see good returns for both lamb and mutton, with hooks price sitting around \$10.80 - \$11.00/kg for lambs and \$8 - \$8.30/kg for mutton.

New seasons store sucker lambs are starting to filter through local markets seeing strong competition for good fresh rounded types.

The cattle job is holding firm with numbers starting to rise. With many having feed in paddocks now, light re-stocker calves are in high demand and seeing a rise in pricing.

Feeder and kill cattle have remained firm.

MARKET RESULTS - AUGUST 27TH 2026

87 Cattle, 352 Sheep & Lambs

CATTLE	Weight Range	Low c/kg	High c/kg	Low \$/Head	High \$/Head

AFTER MARKET EMAILS

So many of our clients are now receiving their reports after a market via email. While this is convenient for all involved, we want to make sure that our clients know if they have any questions about their pricing, or want to know more about the current market prices, you are always welcome and encouraged to give Ashley, David or Alan a call to chat about it. Email is great, but it shouldn't replace a conversation.

A note from the vendors:

Hi All, Just a short note to invite you to the 2026 Pepper Well ram sale on the 2nd of Sept. 2026 1pm. at Keyneton. The 40 strong sale team is looking outstanding with genuine early growth, genetic muscle, fat with wool quality and those soft supple skins throughout the line up. Cataloguing will be finalised mid August and available soon after. SAMSET sire evaluation 2024 results have been very interesting. PW 222047 progeny performed well, especially on early muscle with early growth. The interesting part is when the wethers were slaughtered 6 months after post weaning data collection, at hgt stage, just about all the other sire groups had caught up. This confirms the early maturity with moderate adult size traite built into the Pepper Well DNA over many years. A trait hard to sell when comparing bloodlines as 2 year olds without seeing their progeny in respective groups. Richmond 220339 purchased for \$14000. His lambs have also done very well in the 2025 evaluation, always in or just missing the top 10% trait leader group. Hence claiming the big box a chocolates in the SM index by a clear margin. He is one of those rams who breeds exceptional ewes with almost no culls, a very valuable trait. Ella – Matta 210083, purchase price \$20,000, still breeding big deep heavy square bodies with muscle and fat and CFW. The season seems to be shaping up quite well and as far as I know every district in SA is receiving good rainfall. Also with wool, lamb and mutton prices at record highs, that will stay high until the national sheep flock rebuilds. So for the next 2-3 years the prospects are looking very good indeed. With low national ewe numbers in mind, one of the fastest ways to rebuild your flock is to join ewe lambs. This year we achieved 80% conception on ewe lambs joined. That mob of ewe lambs was the entire drop, so this result is quite remarkable and as good as it gets from a merino. Joining ewe lambs successfully is something Pepper Well has been breeding towards for quite a while and intend to expand on. I can't see any blatant production trade-offs yet, as long as you have enough feed on offer to keep the ewes in good condition and \$120/lamb at weaning its very attractive. The 2027 ram sale will feature more of these Aug. drop rams out of ewe lambs, something to seriously consider. Last year we offered clients vasectomized teaser rams and have already had another order for 10 more, call me to make a booking. Also I am always available for our client free classing service. Pre-sale inspections are more than welcome, just call me to arrange. See you on sale day. Regards Hansi PH 0427 790 676

A note from the vendors:

The Bunyara Poll Merino Ram Sale will be on Thursday the 17th of September 2026

It will be on the property at 467 Shannon Road, Moculta.

Inspections will be from 11am with the sale start time of 1.00pm.

What a difference early rain and green grass makes, such a contrast to last year. Lambing percentages have been really good, which will help rebuild the merino ewe flock.

Prices for wool and meat are also very good, helping those who have stayed with merinos to enjoy good returns from their stock.

Our sale rams are again carrying bright white stylish medium wools on wide, square, plain bodies. The sale team has again great depth through the line up. We have numerous families breeding really well, which is very pleasing for us.

A light luncheon is provided on sale day. You can view our top rams on our Bunyara facebook page.

Catalogues both hard copies and electronic will be available in early September. Looking forward to meeting you on our sale day.

Regards Ian and Fiona Koch.

A note from the vendors:

Ardene Australian Whites proudly invites producers to our 13th Annual Stud & Flock Sale, to be held on Thursday, 17 September at Mount Torrens, South Australia.

This year's sale presents an outstanding opportunity to secure proven Australian White genetics from one of the breed's leading studs. On offer are:

- 10 Elite Stud Rams
- 20 Elite Stud Ewes
- 100 AWSBA Blue Tag Flock Rams

With lamb and mutton markets remaining strong and Australian Whites continuing to command premium demand throughout the supply chain, there has never been a better time to invest in superior genetics and see a fast return on investment. Whether your objective is increased lamb production, improved maternal performance or a low-maintenance shedding flock, Ardene Australian Whites provide the genetics to help maximise returns.

The sale will commence at 1:00 pm, conducted by Nutrien Livestock and Elders, with full online bidding through AuctionsPlus.

Sale inspections are welcome from 11:00 am on sale day, prior to the sale by appointment.

We look forward to welcoming both returning and new clients to Mount Torrens for another outstanding offering of Ardene Australian White genetics.

Rachel Chirgwin
0428 600 265

A note from the Belmont vendors:

You're invited to Talunga Park, Mount Pleasant on Wednesday September 23, when I'll have 40 outstanding Suffolk rams on offer. With the majority sired by Warra-J 211234, complemented by Allendale and Bowen rams, these rams were still all showing their lambs teeth when scanned on August 19, and revealed some outstanding eye muscle measurements, the highest being 49. Again, there is extraordinary length in some rams which will help to put those extra chops on your prime lambs.

No LambPlan figures this year.

With continuing good returns for all sheep in the meat market, enthusiasm in this industry is going well, on top of very favourable seasonal conditions, after several trying years. Thankyou to the feedlotters who give very good reports when finishing the Suffolk lambs, as being the fastest to reach marketable weights. Yes, the XB lamb job is still going strong.

The Border Leicester offering of 15 exceptional rams should appeal to the breeders of First Cross BLM ewes in the continued demand to build ewe numbers across many regions. These were shorn in the early days of August, have shown exceptional growth since and are all sired by Jackson 210116, a member of the Supreme Group of 3 Long Wool sheep at 2022 Adelaide Royal. These were also scanned and weighed on August 19.

Border Leicester Rams – while without figures- are still producing the top-priced Border Leicester/Merino ewe lambs and 1.5yr BL/M ewes at the Mount Pleasant Off-shears Sale, and we thank our loyal clients for presenting these top quality offerings. Enquiries and inspection prior to sale day are most welcome. Please call me to arrange a time. Otherwise, come along and enjoy a complimentary lunch on sale day.

PIRSA eID Traceability Videos

eID traceability videos: your role in the bigger picture

PIRSA's eID Advantage Program is supporting South Australian producers to prepare for mandatory electronic identification (eID) requirements for all sheep and farmed goats by 1 January 2027.

Under the program, a new series of short videos have been released highlighting the bigger traceability picture and the important role each part of the supply chain plays.

The videos feature South Australian sheep producer Lynton Arney, livestock consultant Nathan Scott, Horsham Livestock Exchange manager Paul Christopher and Thomas Foods International Farm Assurance and Supply Chain Manager Mark Inglis.

Drawing on their experiences across the supply chain, they explain how eID strengthens traceability, supports a faster response to disease outbreaks and helps protect Australia's valuable export markets.

In addition to the videos, PIRSA has a range of resources available. Case studies, fact sheets and "how to" guides provide information and support to help producers understand their responsibilities when transferring electronically identified animals and recording movements on the NLIS database as well as exploring how eID data can support better on-farm decision-making.

Watch the videos and explore PIRSA's eID Advantage resources to help your business prepare for full implementation.

Visit: <https://pir.sa.gov.au/eid-traceability>

The eID Advantage Program is delivered in partnership with Livestock SA, Meat & Livestock Australia and AWI Extension SA.

WOOL MARKET MOVEMENTS

EMI 1,853 c/kg clean ↑ 41 cents.

The smallest weekly offering for 6 years, spurred buyers into action. Strong demand for stylish lots with (<1%) VM across all market sectors contributed to the 41 cent rise in the EMI. Most of the rise, 36 cents, occurred on day 1 with prices consolidating on day 2. The EMI in USD terms made similar gains. Wool growers were keen to capitalise on the higher prices on offer, with high clearance rates in all selling centres and market segments. Another small offering is expected next week.

National offering: 23,651 bales ↓ 14,051 bales

National Pass in rate: 2.0% ↓ 14.4%.

26,000 bales on offer in \$10 across the three centres.

Southern Melbourne (Tuesday & Wednesday)

- Merino Fleece: All MPGs recorded double digit price rises, closing 38 (21 µm) to 80 (17.5 µm) higher. 99.4 to 98.9% clearance rates as stylish, well measured lots and those with low VM attracted keen competition.

- Merino Skirtings: Stylish lots with low VM led the pack upwards, as general prices rises occurred on both sale days.

- Crossbreds: Well-prepared, stylish lots were in favour with limited supply sparking buyer activity.

- Oddments: Crutchings lifted up to 40 cents on day 1 as locks carrying up to 3% VM rose up to 20 cents. Low VM, bulky types made further gains on day 2.

Southern Regional Indicator - 1,810 c/kg clean ↑ 42 cents.

Southern Merino Carding Indicator - 1,082n c/kg clean ↑ 26 cents.

Melbourne's pass in rate was 2.2% with 727 bales withdrawn.

FOOTY TIPPING COMPETITION

And the winner is.....SAM!

Held on to the lead from Round 4.

Followed closely by Noelynn, Vicki, Rob & Ash.

Hope to have everyone and more back in the competition again next year.
